

## **RT Cotter and Associates, Inc. creates separate *MSDSdirect*™ division.**

**Monday, August 29, 2005**

RT Cotter and Associates, Inc. an Environmental Health and Safety consulting service provider specializing in the Healthcare industry, announced their *MSDSdirect*(tm) service would become a separate business division.

The *MSDS direct* service provides online Internet-based access to the customized MSDS (Material Safety Data Sheets) inventory of its customers. *MSDS direct* was created to be a high value, cost-effective improvement beyond "fax-on-demand" services. *MSDS direct* also delivers a high level of personal service in maintaining an accurate and truly compliant MSDS management solution. The creation of a separate division reflects a commitment by RT Cotter and Associates, Inc. to improve the quality and components of the Internet-based service and expand its market to include new industries based on its growing database of MSDSs.

"Particularly in Healthcare, we see clients paying a premium for MSDS services that emphasize high-overhead customer service phone centers that primarily deliver MSDS by fax. Our clients get instant access to their own inventory wherever there is an Internet-connected computer. We also provide cost-effective personal attention at their site to keep their inventory current and to organize the paper MSDS catalog they are legally required to maintain." explains company President Rick Cotter.
